OFFICIAL WEBSITE HANDOVER PACKAGE

ANNAI TUITION CENTRE

Trichy — Established 2008 · 7,000+ Alumni

Comprehensive handover documentation, project scope overview, live verification links, access ownership instructions, and ongoing maintenance guidelines.

Client / Institution	**Annai Tuition Centre**, Puthur, Trichy – 620 017
Founder & Academic Director	**S. Thiyagarajan**, M.Sc. (IT), B.Ed.
Primary Contact Numbers	+91 96262 65456 | +91 99941 48476
Official Email	annaituitioncentre@gmail.com
Live Production URL	**https://annai-tuition-centre-lv8z.vercel.app/**
Technology Architecture	React 18 + Vite 6 + React Router v7 + Lucide Icons + Vercel Cloud
Date of Handover	October 31, 2026
Deployment Status	**• 100% Deployed & Live on Vercel Global Edge Network**

1. Project Scope & Architecture Overview

The Annai Tuition Centre web platform has been redesigned into a modern educational web application tailored specifically for students and parents in Trichy. The application emphasizes trust, academic credibility, mobile responsiveness, and high conversion through direct WhatsApp & phone contact channels.

Core Technology Stack

- **Frontend Engine:** React 18 single-page application built with modern functional components and hooks.
- **Build System:** Vite 6 bundler for rapid page load times and optimized code splitting.
- **Routing System:** React Router DOM v7 providing seamless page transitions without page reloads.
- **Design Theme:** Royal Sapphire Navy (`#071536`) with Golden Warm Accents (`#f5b82e`). WCAG AA contrast compliant with zero unstyled white containers.
- **Hosting Infrastructure:** Vercel Global Edge Network with automated continuous integration (CI/CD) and free SSL/TLS certificate.

2. Key Features & Page Breakdown

Home Page (/)

Opening hero, Instant Batch Enquiry, Founder S. Thiyagarajan 16+ years highlight, Classes 1 to 12 overview, Toppers preview, and Puthur campus locations.

About Us (/about)

Exclusive home for all institution credentials: 7,000+ Alumni legacy, 24/7 CCTV surveillance, Dedicated Parking Facility, and Girls' Safety protocols.

Classes & Curriculum (/classes)

Computer Science, Biology, and Specialized Tutorials subject tags, alongside Classes 1 to 12 grade syllabi with direct admission enquiry buttons.

Faculty & Careers (/faculty)

Founder Director profile, mentors with 7–8+ years teaching experience, and an active 1-click WhatsApp application for teaching jobs.

Results & Milestones (/results)

Verified student board toppers, 10th and 12th marks gallery, and academic centum scores presented in high-contrast royal sapphire cards.

Contact & Campuses (/contact)

Both campus addresses (Vannarapettai & Ramakrishna Middle School), live interactive Google

Maps embeds with driving directions, and instant phone calls.

Instant WhatsApp Admission Forwarding:

The Admissions application form on `/admissions` is fully automated. When a parent or student submits the form, it formats all student details (name, class, mobile, school, preferred branch) and opens WhatsApp directly to **96262 65456**, allowing instant enrollment communication without relying on third-party servers.

3. Access & Ownership Transfer Instructions

> **IMPORTANT SECURITY DIRECTIVE (பாதுகாப்பு நெறிமுறை):**
> Passwords are **NEVER** written in plaintext documents. True ownership and administrative access are granted securely through direct account transfer and administrative invitation on GitHub and Vercel.

Step 1: Vercel Cloud Hosting Ownership Transfer

Vercel hosts the live production website. To transfer complete administrative control to the client:

1. The client signs up for a free Vercel account at **https://vercel.com/signup** using the official tuition email (`annaituitioncentre@gmail.com`).
2. In the developer Vercel Dashboard, navigate to **Project Settings** → **Members**.
3. Invite `annaituitioncentre@gmail.com` as an **Owner / Admin**.
4. The client accepts the invitation from their email. The project can also be transferred completely to the client's team under **Project Settings** → **Transfer Project**.

Step 2: GitHub Source Code Repository Transfer

The entire source code is maintained on GitHub under Git version control:

1. The client creates or shares their GitHub username or email (e.g. `annaituitioncentre`).
2. In the GitHub repository settings (`Nisanth32/annai-tuition-centre`), click on **Collaborators** → **Add people** and grant **Admin access**.
3. Alternatively, under **Settings** → **Danger Zone** → **Transfer Ownership**, the entire repository can be permanently transferred to the client's GitHub account.

Step 3: Connecting a Custom Domain Name (e.g. annaituitioncentre.com)

When the client purchases or points their custom domain name:

1. Go to Vercel Dashboard → Select **annai-tuition-centre** → **Settings** → **Domains**.
2. Enter the desired domain (e.g., `annaituitioncentre.com` or `.in`) and click **Add**.
3. Vercel will display two DNS records to configure at the domain registrar (GoDaddy, Hostinger, Namecheap):

- 4 **A Record:** Name `@` → Value `76.76.21.21`
- 5 **CNAME Record:** Name `www` → Value `cname.vercel-dns.com`

6 Within minutes, Vercel verifies ownership and automatically issues a free, auto-renewing SSL certificate.

4. Ongoing Maintenance & Backup Protocol

- **Automatic Git Backups:** Every code modification is tracked with complete history in Git commits. Any version can be restored at any time in seconds.
- **No Server Maintenance Required:** The website is deployed as a static-optimized SPA on Vercel's serverless CDN, meaning zero server crashes, zero maintenance fees, and 99.99% uptime.
- **Updating Student Results / Toppers:** Whenever new board results are released, new marks and student photos can be added to `src/App.jsx` and deployed instantly with `git push`.

Document prepared for S. Thiyagarajan, Founder & Academic Director, Annai Tuition Centre, Trichy.
